Sample APA-Style Document Using the apa7 Package

Daniel A. Weiss

Departement of Psychology

A University Somewhere

This demonstration paper uses the apa7 LaTeX class to format the document in compliance with the 7th Edition of the American Psychological Assocation's *Publication Manual.* The references are managed using biblatex.

Keywords: APA style, demonstration

We begin with **Shotton1989**. We can also cite this work in parenthesis, like this: (**Lassen2006**).

Note the use of five heading levels throughout this demonstration Method section.

Method

Participants

We had a lot of people in this study, show in Figure **??**.

Materials

Several materials were used for this project. Some of them were already created for prior research.

Paper-and-Pencil Instrument

We used an instrument that we found to be highly successful.

Reliability. The reliability of this instrument is extraordinary.

Validity. We now discuss the validity of our instrument.

Face validity. The face validity is exceptionally strong. Everyone should be impressed.
Construct validity. Also very strong.

Design

This section describes the study's design.

Procedure

The procedure was fairly straightforward, yet required attention to detail.

Changes of Affiliations and other info here to describe what needs to be said

Figure 1

This is my figure caption.

Note. This is an awesome figure.

Results

Table **??** contains some sample data. Our statistical prowess in analyzing these data is unmatched.

Table 1

A Complex Table

Distribution type	Percentage of targets with segment in		Total number of trials per participant
	Onset	Coda	
Categorical – onset[a]	100	0	196
Probabilistic	80	20[*]	200
Categorical – coda[b]	0	100[*]	196

Note. All data are approximate.
[a]Categorical may be onset. [b]Categorical may also be coda.
[*]$p < .05$. [**]$p < .01$.

Discussion

This is a lengthy and erudite discussion. It demonstrates amazing skill in interpreting the results for the masses.
